Art Unit: 1713

Claims 1-17 are currently pending herein.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a norbornene compound with crosslinkable group, classified in class 560, subclass 128.
- II. Claims 2-10 and 12-17, drawn to norbornene polymers, classified in class 525, subclass 289.
- III. Claim 11, drawn to a norbornene compound with epoxy, classified in class 549, subclass 557.

The inventions are independent or distinct, each from the other because:

Inventions of Group I and Group II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product, and the species are patentably distinct (MPEP § 806.05(j)). In the instant case, the intermediate product is deemed to be useful per se, as a reactant in organic syntheses and in agricultural applications, and the inventions are deemed patentably distinct because there is nothing on this record to show them to be obvious variants.

Inventions of Group III and Group II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product, and the species are patentably distinct (MPEP § 806.05(j)). In the instant case, the

Art Unit: 1713

intermediate product is deemed to be useful as a comonomer with ethylene in forming *addition* polymers as evidenced by Whitworth, Jr. et al (note col. 2, formula (I-E) and col. 5, ll. 35 +) and the inventions are deemed patentably distinct because there is nothing on this record to show them to be obvious variants.

In the event the Group II invention is elected for substantive examination, restriction to a patentably distinct species is required as set forth below.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: As shown by Formula II;

Species II: As shown by Formula II-2;

Species III: As shown by Formula II-3;

Species IV: As shown by Formula III;

Species V: As shown by Formula III-2.

Species VI: As shown by Formula III-3.

Species VII: As shown by Formula III-4.

Species VIII: As shown by Formula IV.

Species IX: As shown by Formula IV-2.

Species X: As shown by Formula VI.

Species XI: As shown by Formula VI-2.

Species XII: As shown by Formula VII.

Art Unit: 1713

Species XIII: As shown by Formula VIII.

Species XIV: As shown by Formula VIII.

Species XV: As shown by Formula VIII-2.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 1713

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to Examiner F. M. Teskin whose telephone number is (571) 272-1116. The examiner can normally be reached on Monday through Thursday from 7:00 AM - 4:30 PM, and can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu, can be reached on (571) 272-1114. The appropriate fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
